

University of Minnesota RICO Criminality versus Mrs. Jummai Nache

Mr. Philip Nache and I assembled a timeline, including the “adverse event” that befell his wife Jummai. That “adverse event” **was a matter of FDA/CDC foreknowledge**; known as venous / arterial thromboembolism.

Memo 1: Mrs. Jummai Nache employed at University of Minnesota (UMinn) Physicians group; perfectly healthy, no COVID symptoms. UMinn refuses to administer COVID “test” prior to injection. No information provided by UMinn regarding their knowledge of mRNA “adverse events.” No information provided on liability immunity. Informed consent not offered / is violated by UMinn.	
First Pfizer mRNA injection; no prior or existing COVID symptoms.	January 13 2021
Reaction to first Pfizer needle immediate; fever, headache; prior to first needle Jummai had <i>no</i> health issues.	January 16, 2021
Second Pfizer mRNA injection; prior to second needle Jummai still had no COVID respiratory symptoms.	February 1 2021
No COVID respiratory symptoms, however chest pain; Jummai cannot work.	February 2 2021
Still no COVID respiratory symptoms, but chest pain and heart palpitations now severe, Jummai is rushed to Urgent Care. Finally UMinn administers COVID “test.”	February 6 2021
UMinn claims that post-mRNA injection COVID test of February 6 is “positive.”	February 7 2021
Memo 2: Martha Pollack of Cornell, under direct advice of Pfizer CEO Peter Bourla, begins regurgitating the Bourla lie, at the campus COVID-19 website, that the Pfizer mRNA is, “95% safe and effective.”	
Jummai heart function deteriorates; admitted to Fairview Emergency Room.	February 11 2021
Jummai heart and <u>now</u> respiratory function near total failure; rushed to intensive care at University of Minnesota Medical Hospital.	February 13 2021
Near death, UMinn declares only way to save Jummai is forced lung ventilation.	February 14 2021
Memo 3: IMPORTANT - Now beyond ‘14-day window’ since Jummai received second Pfizer mRNA injection. 80% of deaths post second mRNA needle occur prior to 14 days. 90% of injuries post second mRNA needle occur prior to 14 days. Ms. Rochelle Walensky of CDC secretly dictates that all injury/death occurring prior to 14-day deadline to be designated as “unvaccinated.” Jummai injuries not counted in CDC VAERS; post 14 day amputations recorded by UMinn as “COVID-19.”	
Unannounced, UMinn retests for COVID, continues to record as “positive.”	February 16 2021
Prior to Pfizer needles, Jummai never hospitalized. “A model of health,” life-long <i>non-smoker / non-drinker</i> . After 14-day-window UMinn reports all new diagnosis : 1. Arterial blood clot 2. Respiratory distress 3. Cardiomyopathy 4. Anemia 5. Ischemia 6. Multiple Inflammatory Syndrome 7. Severe damage to legs, both hands, all fingers; all are blood clot related.	March 2021
Without doing in-person exam of Jummai , Rochelle Walensky/CDC send letter declaring her 1 – 7 diagnosis as “ <i>un-related</i> ” to Pfizer mRNA injection (?!).	March 31 2021
Jummai health destroyed, living in continuous pain/agonny.	April May June 2021
Both legs of Jummai amputated due to Item 7, severe blood clot damage.	June 21 2021
Left hand, fingers of right hand amputated due to Item 7, severe blood clot damage.	July 20 2021
Memo 4: Final condition of Mrs. Jummai Nache is summarized on attached photo-history.
