

Subject: *Their* COVID Relevant Operative

[Last night you asked a reasonable, but also diversionary question:](#)

*“And the question is, **how do we guarantee that nothing like this ever happens again?** How do we prevent future mass hysteria events in the United States? And the answer is very simple. You restore democracy. You give Americans a voice in the policies that affect their lives. That was the system that we had for a couple of hundred years, it was a pretty good system. We ought to go back to it.”*

You mention ‘checks & balances’ but continue a diversion from *their* COVID relevant operative:

If we are going to “GUARANTEE THAT NOTHING LIKE THIS EVER HAPPENS AGAIN,” we must address the criminality-of and rescind in its entirety the issue of:

LIABILITY IMMUNITY

I can assure you that the following person deeply appreciates your diversion to “democracy,” especially with respect to the US Congress:

I recently interviewed with Stew Peters about the criminality of LIABILITY IMMUNITY; this COVID topic is rapidly gaining attention:

The enclosed USB drive contains the above interview. (also here: <https://rumble.com/vgpxyf-beyond-willful-misconduct-bioweapon-victims-demand-shutdown-of-vaxx-program.html>)

Attached is the photo-progression of a victim of Mr. Albert Bourla his LIABILITY IMMUNITY: former Medical Assistant, Mrs. Jummai Nache.

The Nache Family, legal immigrants from Nigeria were unfamiliar with the “democracy” that led to:

LIABILITY IMMUNITY

Mr. Philip Nache would be “happy” to review with you the new day-to-day activities of his family; post the two Albert Bourla needles, which were mandated by the University of Minnesota.

If we want to make sure that this never happens again, and on a world-wide scale, we must expose the criminality-of, and rescind in a very open way, liability immunity.
