Step 2: Import Additional Excel Data

Import data from the Sales_Data worksheet of the ho2_SalesData.xlsx workbook in the My Documents folder into a new table in the database. When prompted, indicate that the first row contains column headings and then proceed to the next wizard step. Set the Indexed property of CustID field so that no duplicates are allowed. Accept the default options for all other fields and then proceed to the next wizard step. Set the CustID field as the primary key and then proceed to
