January 27, 2023

Dr. Albert Bourla
Chief Executive Officer and Chairman
Pfizer Inc.
235 East 42nd Street
New York, NY 10017

Doctor Bourla,

Project Veritas released a video on January 25, 2023, claiming that a person identified as Jordan Walker is Pfizer's Director of Research and Development. In the video, Mr. Walker is seen casually discussing how the COVID-19 virus could be manipulated through "directed evolution," so that Pfizer could preemptively create an effective vaccine for a mutated virus.

Mr. Walker described exploratory research which would admittedly pose a substantial risk to public health and mentioned how the pandemic had benefited Pfizer financially. He further explained that regulators will look the other way as many government officials may want to work for Pfizer and do not want to compromise a future job opportunity.

As you know, Pfizer is a leader in global public health and with American taxpayer dollars developed the COVID-19 vaccine. The company's accountability and transparency with the public are crucial regarding the substance and intent of its research.

I urge you to inform the public regarding the legitimacy of the claims in the video. Pfizer must hold itself accountable to restore trust in the integrity of the company and its employees.

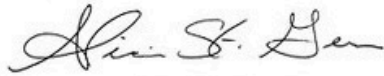

Thank you for your attention to this important matter. I look forward to your timely response.

Sincerely,

Rep. Brad Paquette
